

As a fluent reader in Year 3:

- I can recognize **most** words in my reading book straight away (without having to work them out using my phonics).
- I can read between 90 and 110+ words per minute
- I can **change my voice** to show what is happening in the story and how characters are feeling (expression).
- I take notice of **punctuation** (for example, I stop at full stops and pause at commas).
- I **understand** the meaning of new words I come across in my reading (and I know what to do if I don't understand the word).
- I can improve my fluency by re-reading sentences.
